## UNAUDITED NOTES TO THE FINANCIAL STATEMENTS

### 1 Nature of operations and going concern

The principal activity of the Group is the development and exploration programme of the Ming Copper-Gold Mine in Baie Verte, Newfoundland and Labrador, Canada.

The Group's ability to continue as a going concern, and the recoverability of its mineral properties, is dependent on the copper and gold prices, its ability to fund its development and exploration programs, and to manage and generate positive cash flows from operations in the future. These financial statements do not reflect the adjustments to carrying values of assets and liabilities and the reported expenses and balance sheet classifications that would be necessary should the going concern assumption be inappropriate, and these adjustments could be material.

In common with many exploration companies, the Group raises finance for its exploration and appraisal activities in discrete tranches. On May 3, 2011 the Company raised finance of \$15 million after expenses from the placing of 27,777,778 ordinary shares at 36 pence each. Management continues to closely monitor key milestones associated with bringing the mine into production in the second half of calendar 2011 and is satisfied the Group has sufficient working capital for the forthcoming 12 months. On this basis, the Directors have concluded that the Group is a going concern, however, slippage against key milestones may necessitate other sources of finance to be considered to satisfy short term working capital requirements as marketing commences. There is no certainty that these funds will be forthcoming.

### 2 Accounting policies

Details of the main accounting policies of the Group are included in note 2 of the financial statements for the year ended 31 July 2010. The following additional accounting policies have been applied in the current nine months:

#### **Revenue recognition**

Revenue comprises the fair value of the consideration received or receivable for the sale of goods and services in the ordinary course of the Group's activities. Revenue is shown net of sales tax.

The group recognises revenue when the amount of the revenue can be reliably measured, it is probable that future economic benefits will flow to the entity and when specific criteria have been met as described below:

#### *Toll processing*

The Group processes ore at its milling facility. Sales of this service are recognised as the ore is processed. The customer is invoiced based on tonnes processed each month at the price specified in the toll processing agreement.

#### **Mineral properties**

Upon transfer of 'Exploration and evaluation costs' into 'Mineral Properties', all subsequent expenditure on the construction, installation or completion of infrastructure facilities is capitalised within 'Mineral Properties'. Development expenditure is net of proceeds from all but the incidental sale of ore extracted during the development phase.

# RAMBLER METALS AND MINING PLC

## UNAUDITED NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

### 2 Accounting policies (continued)

#### Inventory

Stockpiled ore is recorded at the lower of production cost and net realisable value. Production costs include all direct costs plus an allocation of fixed costs associated with the mine site.

Operating supplies are valued at the lower of cost and net realisable value. Cost is determined on an average cost basis.

Under the terms of the equipment lease agreements, no contingent rents are payable.

The bank loan is secured by way of a fixed charge over a property and is repayable in monthly instalments of \$384 over 12 years.

# RAMBLER METALS AND MINING PLC

## UNAUDITED NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

### 7. Interest-bearing loans and borrowings (continued)

#### Gold Loan

During the previous year, the Group entered into an agreement (“Gold Loan”) with Sandstorm to sell a portion of the life-of-mine gold production from its Ming Mine.

Under the terms of the agreement Sandstorm made staged upfront cash payments for the gold to the Group totalling US\$20 million including the final payment of US\$6 million received during the quarter.

For this, the Group has agreed to sell 32% of the payable gold in the first year of production. In each production year following the first year of production, until 175,000oz of payable gold has been produced, the Group has agreed to sell a percentage equal to  $25\% \times (85\% \text{ divided by the actual percentage of metallurgical recovery of gold realized in the immediately preceding production year})$  provided that, if the payable gold production in any production year after the third production year is less than 15,000 ounces, then in each such production year, Sandstorm payable gold shall not be less than 25% of the payable gold. In each production year following the first year of production, after 175,000oz of payable gold has been produced, the Group has agreed to sell a percentage equal to  $12\% \times (85\% \text{ divided by the actual percentage of metallurgical recovery of gold realized in the immediately preceding production year})$  provided that, if the payable gold production in any production year after the third production year is less than 15,000 ounces, then in each such production year, Sandstorm payable gold shall not be less than 12% of the payable gold for the remainder of the period ending 40 years after the date of the agreement. After the expiry of the 40 year term, the agreement is renewable in 10 year terms at the option of Sandstorm.

A 4.5% cash commission is payable with each payment received under the agreement.

There are certain circumstances in which the Gold Loan may be repaid earlier than by the delivery of payable gold as follows:

- (i) If within 18 months of 4 March 2010 (the date of the agreement) the Ming Mine has not started producing gold any amounts advanced will become repayable on demand together with interest at a rate of 8% per annum.
- (ii) If within 24 months of the date that gold is first produced, the Ming Mine has not produced and sold a minimum of 24,000oz of payable gold then a portion of the US\$20 million will be repayable based on the shortfall of payable gold.
- (iii) Within the first 36 months of Commercial production of gold any shortfall in the value of payable gold below the following amounts will be required to be paid in cash:
  - within the first 12 months – US\$3.6 million
  - within the second 12 months – US \$3.6 million
  - within the third 12 months – US\$3.1 million

The Gold Loan is accounted for as a financial liability carried at amortised cost. In determining the effective interest rate implicit in the cash flows arising from the loan the cash flows are forecast at each quarter end based on management’s best estimates of the time of delivery of payable gold, the total amount of gold expected to be produced over the mine life and the timing of that production.

Total interest of \$772,900 was accrued during the nine months. \$49,906 was included in exploration and evaluation expenditure and \$722,994 charged to mineral properties.

## UNAUDITED NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

### 8. Provisions

	<b>30April 2011 \$,000</b>	31 July 2010 \$,000
Reclamation and closure provision		
At 1 August 2010	559	-
Provision during the period	836	559
Unwinding of discount	28	-
At 30April 2011	<u>1,423</u>	<u>559</u>

The reclamation and closure provision has been made in respect of costs of land restoration and rehabilitation expected to be incurred at the end of the Nugget Pond Mill and Ming Mine's useful life. The provision has been calculated based on the present value of the expected future cash flows associated with reclamation and closure activities as required by the Government of Newfoundland and Labrador. The provision relates to restoration of the mill and mine sites. The liability is secured by Letters of Credit totalling \$3.13 million.

### 9. Related parties

#### Transactions with key management personnel

Total key management personnel compensations were as follows:

	<b>3 months to 30 April 2011 \$,000</b>	3 months to 30 April 2010 \$,000	<b>9 months to 30 April 2011 \$,000</b>	9 months to 30 April 2010 \$,000

## UNAUDITED NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

### 10. Share-based payments (continued)

The options outstanding at 30 April 2011 have an exercise price in the range of \$0.19 to \$1.10 and a weighted average remaining contractual life of 8 years (31 July 2010: 9 years).

The fair value of services received in return for share options granted are measured by reference to the fair value of share options granted. The estimate of the fair value of the services received is measured based on the Black-Scholes model. The contractual life of the option (10 years) is used as an input into this model. Expectations of early exercise are incorporated into the Black-Scholes model.

Fair value of share options and assumptions

	<b>3 months to 30 April 2011 \$,000</b>	3 months to 30 April 2010 \$,000	<b>9 months to 30 April 2011 \$,000</b>	9 months to 30 April 2010 \$,000

## UNAUDITED NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

### 11. Financial risk management (continued)

The board of directors determines, as required, the degree to which it is appropriate to use financial instruments and hedging techniques to mitigate risks. The main risks for which such instruments may be appropriate are foreign exchange risk, interest rate risk, credit risk and liquidity risk each of which is discussed below. There were no derivative instruments outstanding at 30 April 2011.

#### Foreign currency risk

The Group's cash resources are held in GB pounds and Canadian Dollars and the Gold Loan is repayable in US dollars. The Group has a downside exposure to any strengthening of the GB pound as this would increase expenses in Canadian dollar terms. This risk is mitigated by reviewing the holding of cash balances in GB pounds. Any weakening of the GB pound would however result in the reduction of the expenses in Canadian dollar terms and preserve the Group's cash resources. In addition, any such movements would affect the Consolidated Balance Sheet when the net assets of the Parent Company are translated into Canadian dollars. The Group has a downside exposure to any strengthening of the US dollar as this would increase the amount repayable on the Gold Loan in Canadian dollar terms. This risk, however, is relevant only should the Gold Loan be repaid in cash under terms set out in note 6. Repayment is envisaged in payable gold which is denominated in US dollars. Once the Ming Mine is in production, this will mitigate this foreign currency risk.

The Group does not hedge its exposure of foreign investments held in foreign currencies. There is no significant impact on profit or loss from foreign currency movements associated with the Parent company's assets and liabilities as the foreign currency gains or losses are recorded in the translation reserve.

Exchange rate fluctuations may adversely affect the Group's financial position and results. The following table details the Group's sensitivity to a 10% strengthening and weakening in the GB pound against the Canadian/US Dollar. 10% represents management's assessment of the reasonable possible exposure.

	Equity	
	30 April 2011 \$,000	31 July 2010 \$,000
10% strengthening of GB pound	3	53
10% weakening of GB pound	(3)	(47)
10% strengthening of US dollar	(2,121)	(515)
10% weakening of US dollar	1,735	468

#### Liquidity risk

Prior to Q3 2010 the Group had relied on shareholder funding to finance its operations. During Q3, 2010 the Group entered into a financing arrangement in US dollars (see note 7). With finite cash resources and no material income, the liquidity risk is significant. This risk is managed by controls over expenditure. Success will depend largely upon the outcome of ongoing and future exploration and development programmes. Given the nature of the Group's current activities the entity will remain dependent on a mixture of debt and equity funding in the short to medium term until such time as the Group becomes self-financing from the commercial production of mineral resources.

## UNAUDITED NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

### 11. Financial risk management (continued)

The Group's and Company's trade payables, other payables and accrued expenses are generally due between one and three months and the Group's financial liabilities are due as follows:

#### Financial liabilities

At the year end the analysis of finance leases, hire purchase contracts and bank loans which were all due in Canadian Dollars and are at fixed interest rates was as follows:

Fixed rate liabilities	30April 2011 \$,000	31 July 2010 \$,000
Due within one year	1,356	388
Due within one to two years	1,431	374
Due within two to three years	1,445	22
Due within three to four years	1,462	24
Due within four to five years	1,174	5
Due after five years	14	16
	<u>6,882</u>	<u>829</u>

The average fixed interest rate for the finance leases and hire purchase contracts outstanding at 30April 2011 was 5.84%.

#### Credit risk

With effect from July 2007, the Group has held the majority of its cash resources in Canadian Dollars given that the majority of the Group's outgoings are denominated in this currency. As at 30 April 2011, 5% of the Group's cash resources were invested in a short dated term deposits and bankers acceptances. The Group takes a very risk averse approach to management of cash resources and management and Directors monitor events and associated risks on a continuous basis. There is little perceived credit risk in respect of other receivables. The Group's maximum exposure to credit risk at 30April 2011 was represented by receivables and cash resources.

#### Interest rate risk

The Group's policy is to retain its surplus funds on the most advantageous term of deposit available up to twelve month's maximum duration. Details of the Group's borrowings are described in note 6. If the interest rate on deposits were to fluctuate by 1% there would be no material effect on the Group's reported result.

#### Commodity price risk

Commodity price risk is the risk that the Group's future earnings will be adversely impacted by changes in the market prices of commodities. The Group is exposed to commodity price risk as its future revenues will be derived based on contracts with customers at prices that will be determined by reference to market prices of copper and gold at the delivery date.

## UNAUDITED NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

### 11. Financial risk management (continued)

#### Commodity price risk (continued)

The Group calculates the effective interest rate on the Gold Loan based on estimates of future cash flows arising from the sale of payable gold. In estimating the cash flows the following table details the Group's sensitivity to a 10% increase and a 25% decrease in the price of gold. These percentages represent management's assessment of the reasonable possible exposure.

	<b>Gross assets</b>	
	<b>30April 2011 \$ ,000</b>	31 July 2010 \$ ,000
10% increase in the price of gold	(170)	(37)
25% decrease in the price of gold	462	106

#### Financial assets

The floating rate financial assets comprise interest earning bank deposits at rates set by reference to the prevailing LIBOR or equivalent to the relevant country. Fixed rate financial assets are cash held on fixed term deposit.

At the period end the cash and short term deposits were as follows:

	Fixed rate assets	Floating rate Assets	Total	Average period for which rates are fixed	Average interest rates for fixed rate assets
<b>At 30 April 2011</b>					
	<b>\$,000</b>	<b>\$,000</b>	<b>\$,000</b>	<b>Months</b>	<b>%</b>
GB Pound	118	51	169	1	0.25
US \$	-	789	789	-	-
Canadian \$	-	1,519	1,519	-	-
	<b>118</b>	<b>2,359</b>	<b>2,477</b>		
<b>At 31 July 2010</b>					
	<b>\$,000</b>	<b>\$,000</b>	<b>\$,000</b>	<b>Months</b>	<b>%</b>
GB Pound	484	67	551	1	0.25
Canadian \$	6,351	1,098	7,449	2	0.35
	<b>6,835</b>	<b>1,165</b>	<b>8,000</b>		

#### Fair values

In the directors' opinion there is no material difference between the book value and fair value of any of the group's financial instruments.

#### **12. Subsequent Events**

On May 3, 2011, the Company placed 27,777,778 Ordinary shares at 36 pence each raising CAD\$15 million after expenses.

On June 1, 2011 the Group signed an Exploration and Development Alliance with Maritime Resources Corp. and Commander Resources Corp. which will see the sharing of technical expertise for the exploration and development of two main properties in the Green Bay area of Newfoundland and Labrador. As part of the Alliance the Group plans to complete an economic assessment on thereopening of the former producing Hammerdown Mine which originally processed its ore at Rambler's Nugget Pond Mill. In addition the Alliance plans to evaluate the economic viability of the Orion Deposit as a potential feed source of the Nugget Pond Mill.
